

Ch 15 Study guide
Regular chemistry

Vocabulary

Solution

Solute

Solvent

Aqueous

Amalgam

Tincture

Electrolyte

Nonelectrolyte

Soluble(miscible)

Insoluble (immiscible)

Suspension

Colloid

Saturated solution

Unsaturated solution

Supersaturated solution

Molarity

Diluted vs Concentrated

Know how to interpret and read a solubility graph.

Be able to give several examples of solutions that are not liquids.

Be able to calculate the concentration of a solution in Molarity

Be able to calculate the concentration of solution after being diluted.
