

## Solving Systems by Substitution Day 1 GP

Date \_\_\_\_\_ Period \_\_\_\_\_

**Solve each system by substitution.**

1)  $y = 6$   
 $y = -3x - 18$

2)  $y = -4x + 6$   
 $y = 2$

3)  $y = -6x + 9$   
 $y = x - 5$

4)  $y = -6x - 17$   
 $y = 4x + 23$

5)  $2x - 3y = -5$   
 $y = 5$

6)  $y = 4$   
 $5x - 4y = -11$

7)  $-4x + 6y = 2$   
 $x = 4$

8)  $2x + 8y = -18$   
 $x = -1$
